Amendment to PET LITTER COLLECTION BAG AND SPATULA

Hrair Minassians, inventor

Serial No. 10/646,173

Filed August 21, 2003

Page 3 of 9

In the Claims:

Claims 1-2 (canceled)

3.(currently amended): A pet litter collection bag and spatula comprising:

a flexible walled bag having a first internal compartment, said bag having an

inner end and an outer end, said outer end being open forming an access opening;

a single layer spatula having a front surface and a rear surface, a graspable

handle attached to said rear surface, said front surface being formed in a scooping edge, said

spatula having a top surface, said spatula being formed of a bendable material, said spatula

being mounted to said inner end of said bag closing such with said front surface located

exteriorly of said bag and said rear surface being located within said first internal

compartment;

whereby a user's hand and arm is to be inserted through said access opening

with the user's hand grasping said graspable handle and then maneuvering said spatula to

cause pet litter to be supported on said top surface, then the user reverses the position of

said bag locating said spatula and the pet litter within a newly formed second internal

compartment of the bag eliminating said first internal compartment; and

The pet litter collection bag and spatula as defined in Claim 1 wherein:

said top surface being having a roughened area, said roughened area

comprising a mass of evenly spaced apart recesses each of which has a closed bottom, said

roughened top-surface area facilitating the retention of pet litter on said top surface after

such has been collected.

Claim 4 (canceled)

5.(currently amended): A pet litter collection bag and spatula comprising:

a flexible walled bag having a first internal compartment, said bag having an

inner end and an outer end, said outer end being open forming an access opening;

a single layer spatula having a front surface and a rear surface, a graspable

handle attached to said rear surface, said front surface being formed in a scooping edge, said

spatula having a top surface, said spatula being formed of a bendable material, said spatula

being mounted to said inner end of said bag closing such with said front surface located

exteriorly of said bag and said rear surface being located within said first internal

compartment;

whereby a user's hand and arm is to be inserted through said access opening

with the user's hand grasping said graspable handle and then maneuvering said spatula to

cause pet litter to be supported on said top surface, then the user reverses the position of

said bag locating said spatula and the pet litter within a newly formed second internal

compartment of the bag eliminating said first internal compartment; and

The pet litter collection bag and spatula as defined in Claim 1 wherein:

said scooping edge being scalloped forming a series of smoothly contoured

bumps which facilitates the picking up of the pet litter.

Claims 6-11 (cancelled)

Amendment to PET LITTER COLLECTION BAG AND SPATULA Hrair Minassians, inventor Serial No. 10/646,173 Filed August 21, 2003 Page 5 of 9

12.(new) The pet litter collection bag and spatula as defined in Claim 5 wherein:

said top surface having a roughened area, said roughened area comprising a mass of evenly spaced apart recesses each of which has a closed bottom, said roughened area facilitating the retention of pet litter on said top surface after such has been collected.
